

WHAT IS THE VALUE OF RESEARCH?

EU GRANTED RESEARCH

There are 6 projects granted by the European Research Council (ERC) that involve TLS (4 ongoing in 2023) with specific focus on immunotherapy of cancer, antimicrobial resistance and infectious diseases.

TLS GROWS, EMPLOYMENT GROWS

In 2023 the staff of the Foundation has grown from 98 to 114 employees (+16%), for a total of 702 employees - including the staff of all the companies and research groups of the bio incubator (+10%).

HIGHLY QUALIFIED PERSONNEL COMMITTED TO R&D ACTIVITIES

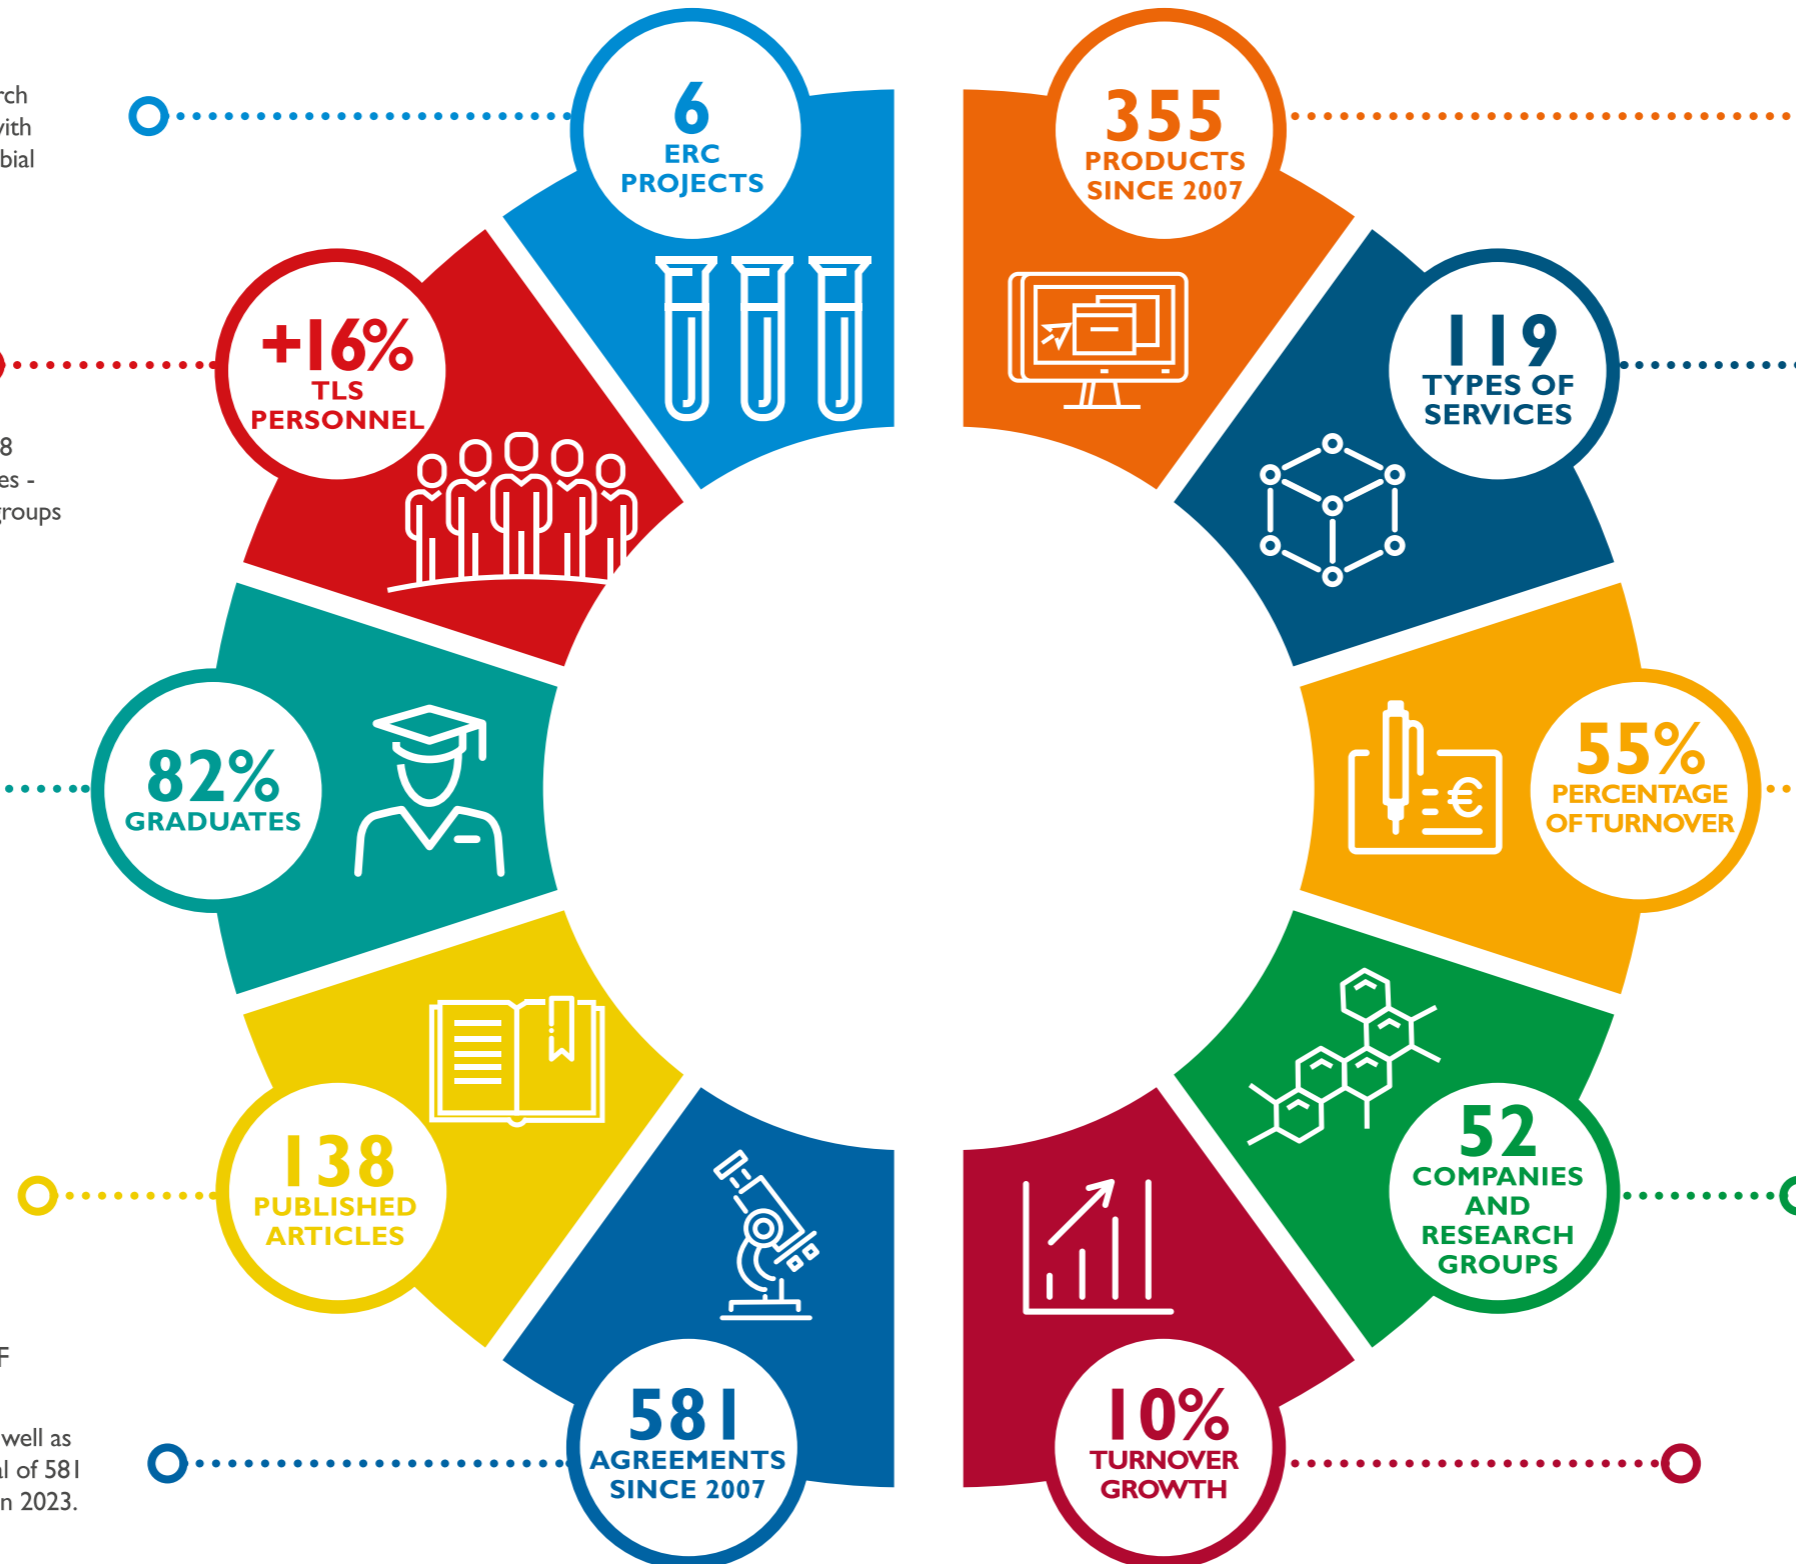

82% of the 702 employees in 2023 at TLS and at the bio incubator have at least a degree. Moreover the number of people employed by the Foundation and involved in research activities and services is growing (67%).

SCIENTIFIC PUBLICATIONS

The scientific production is confirmed to be increasing, with 138 articles published on international scientific journals in 2023. 24 of these articles are the result of scientific research made by Fondazione TLS.

AN INCREASINGLY SOLID NETWORK OF RELATIONS AND COLLABORATIONS

Since 2007 the incubated and affiliated companies, as well as the research groups hosted by TLS, have signed a total of 581 agreements, collaborations and licenses, 17 of which in 2023.

TLS, AN ECOSYSTEM IN GOOD HEALTH

Financial statement as of 31/12/2023

PRODUCTS ON THE MARKET

Since TLS began its activity, a total of 355 (+82 in 2023) products were launched on the market. This is a significant growth which can also be confirmed by the considerable revenue growth and which is attributable to the commercialization of new diagnostic kits and nutritional supplements/nutraceutical products.

A BROAD PORTFOLIO OF SERVICES

The services' offer (119 different types) includes research services, blood tests for clinical trials, environmental analysis and food quality, data management, as well as mobile solutions for medical care services.

THE BIO INCUBATOR, A GROWING REALITY

The growth trend of the percentage of turnover in respect to the total of financial resources is confirmed for 2023. They have increased from 52% of 2022 to 55,4% of 2023.

AN INCREASINGLY RICH ECOSYSTEM

There are 52 companies and research groups in the bio incubator. Specifically: 21 incubated companies engaged in R&D and/or services, 12 research institutions/foundations and 19 affiliated companies/organizations.

OUR COMPANIES MAKE AN EXCEPTIONAL BUSINESS

In 2023 the companies and research groups of the bio incubator have reached 49 M Euros turnover with a growth of 10% (+4,57 M Euros) with respect to 2022.
